Range mentioned is as per IDC tested at ARAI with Single Rider.

600W BLDC
(Peak Power: 1300W)
Powerful Hub Motor

51.2V/30Ah x 2
Battery Capacity

** Practical range may vary around 25% based on road speed, acceleration and braking, battery charge and battery aging, tyre pressure and maintenance of vehicle etc. # The customer should use both batteries, using one battery and not using the other battery while keeping it in discharged state will deteriorate the unused battery. * Not applicable on commercial use.
